Strand's robust System Auditor

strand
surveillance. evolved.

As the leader in intuitive digital IP surveillance software, Strand is committed to creating innovative solutions to help organizations protect their assets. Strand's Enterprise solution for large scale applications and Strand's DNA solution for smaller, distributed applications address the needs of surveillance customers, large and small, worldwide.

1. Ability to view the system health of one server or hundreds of servers over a network setup all from one screen.

2. Provides 24/7 operational status of each camera on the network.

3. Provides 24/7 network bandwidth update from each camera on the network.

4. Provides 24/7 network bandwidth update for each server on the network.

5. Prioritizes non-responding cameras for fast notification of health problem.

6. Provides archive storage days for each camera.

7. Provides updated camera images in one collective screen view from every camera on the network.
