

Decidedly different

Strand video surveillance solutions go beyond traditional monitoring and video playback. Strand offers a unique commercial-grade solution featuring *health care-centric* functionality not available on other surveillance software.

Strand's Health Care ROI commitment

Strand's cost effective, digital technology provides:

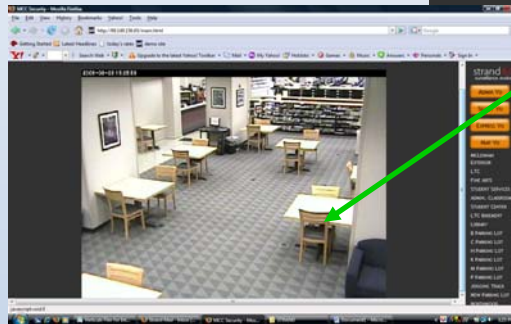

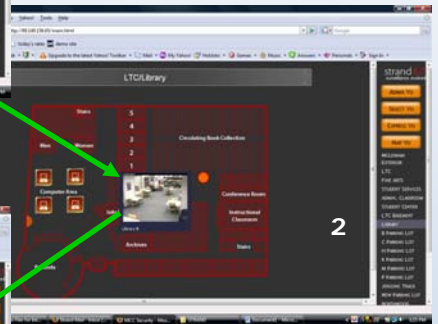

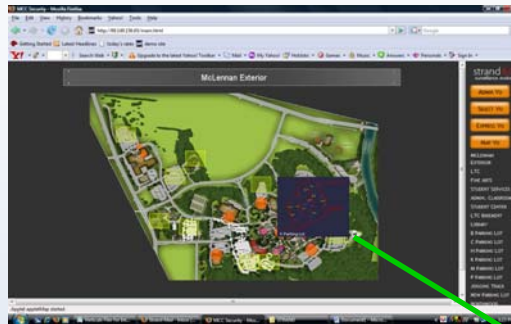

- Intuitive, user-centric, design which reduces the need for complicated and costly user training
- Total system diagnostics that ensures optimal system performance
- Scalable and flexible architecture that easily adapts for growth
- Web-enabled thin-client application which reduces the need for site-based product implementation
- Configurable administrative functions and multi-level security controls that allows for all levels

Strand Enterprise Software for the Health Care Industry

Hospitals have always been considered sacred. Unfortunately, hospitals are no longer immune from criminal assault. Crime continues to find its way into our hospitals at an alarming rate. With a comprehensible vision of the needs of the health care industry, Strand introduces the Satellite Navigator. This revolutionary tool, integrates all sites under one system. Satellite Navigator efficiently and effectively routes site requests while providing continual diagnostic data to one centralized location—a perfect solution for the health care industry.

Health Care Navigator

Seamless navigation between site maps, buildings and floors. One URL allows for total system navigation and enterprise-wide diagnostics.

Enterprise Diagnostics
