

Decidedly different

Strand v8.0 video surveillance solutions go beyond traditional monitoring and video playback. Strand offers a unique Retail solution featuring *retail-centric* functionality not available on other surveillance software.

Strand's retail ROI commitment

Strand's cost effective, digital technology provides:

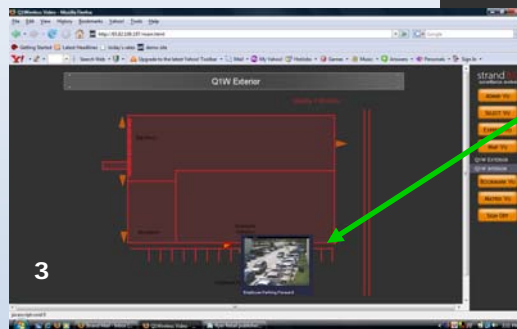

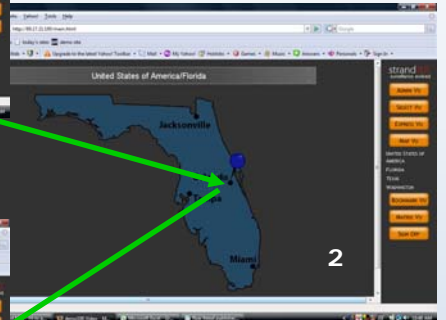

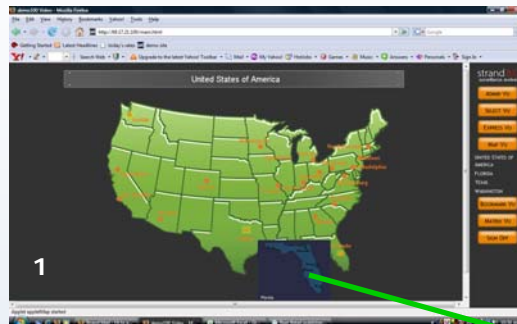

- Intuitive, user-centric, design which reduces the need for complicated and costly user training
- Total system diagnostics that ensures optimal system performance
- Scalable and flexible architecture that easily adapts for growth
- Web-enabled thin-client application which reduces the need for site-based product implementation
- Configurable administrative functions and multi-level security controls that allows for all levels of user proficiency

Satellite Navigator...built for retail

With a comprehensible vision of the advances in the digital IP-surveillance industry, Strand has pioneered the Satellite Navigator. This revolutionary tool built with the Retail Industry in mind, integrates all sites under one system. Strand helps you to reduce shrinkage, better manage merchandising, protect against retail theft, to protect employees, customers and most of all bottom line profits.

Retail Navigator

Seamless navigation between site maps. One URL allows for total system navigation and enterprise-wide diagnostics.

Enterprise Mapping

1. Global view
2. Regional view
3. Site view
4. Camera view
